

JAVIER PÉREZ ARROYO

Junior Full Stack Developer | TypeScript | Angular | Java | Spring Boot | Docker

San José, Costa Rica | +506 8440 8294 | javier25arojas@gmail.com

github.com/javier25arroyo | linkedin.com/in/javier-arroyo-dev

PROFESSIONAL SUMMARY

Junior Full Stack Developer with experience building and maintaining web applications deployed in **containers**, focused on backend and frontend with **TypeScript** and **JavaScript**. Solid background in **Java** and **Spring Boot** for secure, **microservices**-based REST APIs, and in **Angular/TypeScript** for real-time data interfaces, on top of **relational databases** (SQL Server, MySQL). Experienced with **Docker**, **CI/CD** (GitHub Actions), and application security (Spring Security, JWT). Quick to adopt new languages and frameworks, comfortable working in agile teams and collaborative environments.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring Security, JPA/Hibernate, REST API, Microservices, JWT, Swagger/OpenAPI

Frontend: Angular, TypeScript, JavaScript, RxJS, Signals, Tailwind CSS, Angular Material, HTML5, CSS3, responsive design

Databases: SQL Server, MySQL, SQL, normalization, stored procedures, triggers, query optimization

Containers & CI/CD: Docker, Docker Compose, containerized application deployment, GitHub Actions (CI/CD), Nginx, Git, GitHub

Architecture & Testing: Hexagonal (Ports & Adapters), SOLID, OOP, design patterns, JUnit, MockMvc, Mockito, JaCoCo, unit & integration testing, TDD

Methodologies: Scrum, Agile, code review, technical documentation, Git Flow version control

PROFESSIONAL EXPERIENCE

Junior Full Stack Developer | Seismic Monitoring Platform (Sismo Platform)

Feb. 2026 – June 2026

Instituto Costarricense de Electricidad (ICE), Costa Rica

- **Consolidated** monitoring, query, and reporting tools into a single web platform, reducing manual steps and centralizing operational access to seismic information.
- **Designed and implemented** a REST backend in Spring Boot (Java) with **hexagonal architecture**, integrating **3 external** seismic data sources: RSN RSS feed, SERACE files, and USGS API.
- **Automated** reporting and historical query processes with SQL Server, **PDF and CSV** exports, and **scheduled jobs** for automatic seismic event detection.
- **Built** an Angular SPA with **signals**, JWT interceptors, route guards, geospatial station visualization, and charts for real-time data analysis.
- **Produced** technical documentation for setup, main modules, endpoints, user flows, OpenAPI docs, and maintenance.

Junior Full Stack Developer | Academic and Personal Projects

May 2021 – Present

CENFOTEC University & Independent Projects, Costa Rica

- **Designed** academic and personal full stack web applications with Angular (standalone components), Spring Boot microservices, authentication, CRUD, reports, and data administration.
- **Implemented** secure REST APIs with JWT authentication, validations, pagination, structured error handling, and Swagger documentation, strengthening access control and endpoint protection.
- **Modeled** normalized databases with stored procedures and triggers; **coordinated** Scrum sprints with GitHub version control and code reviews.

EDUCATION

Bachelor's Degree in Software Development Engineering | CENFOTEC University, San José Sept. 2023 – Present

Associate Degree in Software Development | CENFOTEC University, San José

Mar. 2021 – May 2023

CERTIFICATIONS

CCNA 1: Introduction to Networks | Cisco Networking Academy | Completed: Apr. 29, 2025

Scrum Fundamentals Certified (SFC) | SCRUMstudy | Granted: Mar. 13, 2023

LANGUAGES

Spanish (native) | **English** (intermediate, advanced technical reading)
