PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years designing and deploying scalable web applications for enterprise and government environments. Specialized in **Java 21**, **Spring Boot 3.5** with **hexagonal architecture (Ports & Adapters)**, **Angular** (signals, standalone components), and **SQL Server**. Proven experience implementing secure REST APIs with **JWT**, integrating external systems, automating **CI/CD** pipelines with **Docker** and **GitHub Actions**, and applying **SOLID** principles and **Scrum** methodologies. Focused on clean code, automated testing, and delivering business value.

TECHNICAL SKILLS

Backend: Java 21, Spring Boot 3.5, Spring Security, JPA/Hibernate, REST API, JWT, Swagger/OpenAPI

Frontend: Angular, TypeScript, RxJS, Signals, Tailwind CSS, Angular Material, HTML5, CSS3

Databases: SQL Server, MySQL, normalization, stored procedures, triggers, query optimization

DevOps & Cloud: Docker, Docker Compose, GitHub Actions (CI/CD), Nginx, Git, GitHub

Architecture & Testing: Hexagonal (Ports & Adapters), SOLID, design patterns, JUnit, MockMvc, TDD

Methodologies: Scrum, Agile, code review, technical documentation, Git Flow version control

PROFESSIONAL EXPERIENCE

Full Stack Developer • Seismic Monitoring Platform (Sismo Platform)

Feb. 2026 – May 2026

Instituto Costarricense de Electricidad (ICE), Costa Rica

- **Architected** REST backend in Spring Boot 3.5 (Java 21) using **hexagonal pattern**, integrating **3 external data sources** (RSN RSS feed, SERACE files, USGS API).
- **Developed** automated processing of SERACE accelerograph files: intensity analysis, magnitude calculations, and RSN origin propagation with chart generation.
- **Implemented** historical endpoints persisted in SQL Server, **PDF and CSV** report export, and **scheduled jobs** for automatic seismic event detection.
- **Built** Angular SPA with **signals**, JWT interceptors, route guards, geospatial station visualization, and interactive query module with charts.
- **Configured Docker** containerization, **CI/CD** pipeline in GitHub Actions, Swagger/OpenAPI documentation, and unit/integration tests with JUnit and MockMvc.

Full Stack Developer • Academic and Personal Projects

May 2021 – Present

CENFOTEC University & Independent Projects, Costa Rica

- **Designed** full stack web applications with Angular (standalone components) and Spring Boot microservices connected to SQL Server/MySQL, applying SOLID patterns.
- **Implemented** secure REST APIs with JWT authentication, validations, pagination, structured error handling, and Swagger documentation.
- **Modeled** normalized databases with stored procedures and triggers; **coordinated** Scrum sprints with GitHub version control and code reviews.

EDUCATION

Bachelor's Degree in Software Development Engineering • CENFOTEC University, San José Sept. 2023 – Present

Associate Degree in Software Development • CENFOTEC University, San José

Mar. 2021 – May 2023

High School Diploma • Academia BRECA, Cartago

2020

CERTIFICATIONS

CCNA 1: Introduction to Networks • Cisco Networking Academy

Scrum Fundamentals Certified (SFC) • SCRUMstudy

LANGUAGES

Spanish (native) • **English** (intermediate, advanced technical reading)
